To start charging:

Present your RFID card or key fob to the reader.

Select the correct charging option for your vehicle from the 3 presented on screen.

You will then be prompted to connect your vehicle.

**Ultracharge**

**DC Combo**
- VW e-GOLF
- BMW i3

**CHAdemo**
- Nissan Leaf
- Mitsubishi Outlander
- KIA Soul

The CHAdeMO differs slightly to the other cables as you will need to press the button down to release.

Connect the plug into the car. The unit will then run a safety check, which will be displayed on the screen.

The charging screen will then appear and the vehicle will begin charging.

To finish Charging:

Present the RFID card or key fob to the reader as before.

The display will show a summary of your charging session.

To disconnect remove the cable from the vehicle and replace back into the charging unit.
